

## Blind Spot Sensor System Trial Program

Welcome to the EmBrazé trial program. Brazé Mobility offers a demo program to enable access to products for select innovative clinics and institutions. Please fill in this form to request a demo unit to be sent to your clinic.

When complete, please send form to Maddie at [madeleine.r@brazemobility.com](mailto:madeleine.r@brazemobility.com) to begin your trial!

Approximate number of power wheelchair users the clinic sees in any given month: \_\_\_\_\_

### **In-service**

As a part of the emBrazé program, Brazé Mobility offers free in-services to provide information about our blind spot sensor systems. These sessions are typically 45 min-1h, and include a product demonstration and Q&A. We offer both virtual and in-person in-services, depending on schedule and proximity. Please indicate if you would prefer a virtual or in-person in-service. Please note we are located in Toronto ON.

I would like a virtual in-service

I would like an in-person in-service

### **Trial Specifications:**

EmBrazé trials are **30 days** from the date of receipt of the unit. We ask that you try the unit with as many clients as possible during that trial period. If you require a trial extension, please contact your Brazé Mobility representative.

### **When would you like a trial?**

As soon as possible

As close to \_\_\_\_\_ as possible

## Blind Spot Sensor System Trial Program

### Required Information

Braze Mobility blind spot sensor systems were designed to mount easily on any wheelchair, power and manual. Different chairs may require different configurations, so we ask that you provide as many details as possible about the clients you intend to demo on.

	Client 1	Client 2	Client 3	Client 4
Make of chair				
Model of chair				
Drive train (front/middle/rear wheel drive)				
Does client wheelchair have power tilt?				
Does client wheelchair have power recline?				
Does client wheelchair have seat elevation?				
Is the wheelchair left handed drive?				
Does the client have any visual impairment				
Does the client have any spasticity?				

How does your trial process and procurement process work?

- All clients must have trialed unit before an order can be placed for them
- All therapists must have trialed a unit before placing an order
- If a client could benefit from the system an order can be placed regardless of whether or not a trial has been done
- Other (please explain below)

Information about the emBraze Trial program

1. Trials are **30 days**.
2. Trial **extensions** may be granted, situationally dependent. We are a small company, dedicated to keeping costs affordable. Because of this, we limit the number of demo units available at any one time. To ensure that the maximum number of people can benefit from the trial program, we limit the length of trial periods.
3. EmBraze demo units include a Braze Sentina with **visual, auditory and vibration feedback**. The unit can be used with visual and vibration feedback, audio and visual feedback or all three feedback options. Units ordered for purchase can be configured to be used with three vibration pads and audio.
4. In keeping our costs as low as possible, we rely heavily on word of mouth marketing. We ask that if you find our units beneficial, that you introduce us to other therapists and clinics that could benefit from the use of our systems. Following your emBraze trial period, we will ask that you provide **feedback and a referral**.
5. We are there for you! If you need any assistance, whether with installation, general use or have any questions please **contact us** at any time. Maddie is the customer service representative, and you can reach her at [madeleine.r@brazemobility.com](mailto:madeleine.r@brazemobility.com).
